

# Quincy Compressor® Air Master® Series

## Four-Cylinder 5 hp Industrial Single-Stage

You're familiar with the Quincy Air Master two-cylinder, single-stage compressor. Now, we have a four-cylinder single-stage version. We developed the four-cylinder compressor with several of the same components as the two-cylinder single-stage, including cylinders, pistons, and valves.

What does this mean to you and your customer - the four-cylinder single-stage has been designed with the same quality engineered features as all of the Quincy Air Master products. It will deliver the cfm of a "true" 5 hp single-stage compressor. And, this is the "affordable" compressor for the customer wanting more cfm with a maximum working (cut-out) pressure of 125 psi.

**Air Master Series** single-stage units come standard with a one-year warranty on the complete unit and a two-year warranty on the basic compressor (pump). Contact your local authorized Quincy Air Master Service Center for warranty repairs or Quincy Compressor at 217-222-7700.

Electric motors are warranted to the extent of the original manufacturer's warranty. For warranty repair of these items, please contact a local authorized service center.

AIR MASTER SERIES

### Standard Features:

- Single-Stage Cast-Iron Compressor
- Large 2.75" x 2" Bore & Stroke
- Splash Lubrication
- 5 hp 230 Volt Single-Phase Capacitor Start and Run Motor
- Starter Not Required
- 60- or 80-Gallon Vertical ASME Coded Tank
- Inlet Filter/Silencer
- ASME Coded Relief Valve in Discharge Line and Tank
- 125 psig Maximum Working (cut-out) Pressure
- One-Year Warranty (Standard on Unit)
- Two-Year Warranty (Standard on the Basic Compressor)

### Options:

- Heavy-Duty Slow Speed Single-Phase & Three-Phase Motors
- Pneumatic and Electronic Tank Drains

### Four-Cylinder 5 hp Industrial Single-Stage

Model Number	hp	Compressor rpm	cfm @ 40 psig	cfm @ 100 psig	cfm @ 125 psig	Vertical Tank Size (gal)	Ship. Wt (lb)	LxWxH (in)
1V41C60VC	5	930	20.6	18.0	16.9	60	400	29x21x64
1V41C80VC	5	930	20.6	18.0	16.9	80	440	37x22x73

All performance data meets CAGI/PNEUROP PN2CPTC2 and PN2CPTC3 acceptance test codes for electrically and I.C. engine-driven packaged displacement air compressors.
