## FINISHING GROUP SERVICES

The Paint Finishing & Fluid Handling Group provides insightful service ideas and creative concepts to address the process challenges faced by today's manufacturers. Ranging from consulting services such as system design & engineering to 24/7 repairs and planned maintenance programs, our customer focused service goals reduce emissions, waste stream reductions, and energy savings leading to an increase in productivity for our customers.

Our goal is to provide our customers with the best total value in our service, repair, and turn-key system solutions, enhancing their production assembly, finishing, or compressor operations to their peak performance.
