Service & Repair

Industrial Pumps Services & Repair Solutions

From double diaphragm pumps, hose pumps, and piston pumps, C.H. Reed has the fluid dispense and process equipment for low to high viscosity fluids and a variety of aggressive applications. If you have an underperforming industrial pump, our factory-trained, certified technicians can assess the equipment and restore it to optimal efficiency. From preventative maintenance scheduling to advanced troubleshooting, C.H. Reed can help you optimize the longevity and performance of your fluid handling equipment.

Paint Application Tools & Accessories Service & Repair

C.H. Reed offers in-house services to service, repair, and maintain a number of different application accessories (agitators, fluid regulators, color valves, etc.) and different types of spray guns and paint application equipment. Simply send, drop off, or have us pick up your equipment and we'll take it back to our Hanover, PA shop where our factory trained technicians will assess and repair accordingly.

C.H. Reed's factory-trained technicians provide quality maintenance and repair solutions for a wide variety of leading paint spray and process pump manufacturers. Eliminate guess-work and increase plant efficiencies by contacting us for all of your paint finishing and fluid handling needs.
