

C.H. Reed's Paint Finishing and Fluid Handling Group combines modern technologies with creative concepts to address the many process challenges faced by today's manufacturers. Whether it's keeping up with environmental regulations, reducing VOCs and waste streams, or increasing paint transfer efficiencies; we can help you reach your goals. If you "paint it" or "pump it", we're the partner you're looking for!

## PAINT APPLICATION EQUIPMENT

Industrial paint spray technologies are rapidly advancing. Whether you're looking for conventional, automatic, or electrostatic spray guns, or completely customized paint spray packages for metal, wood, plastic, and many more industries, C.H. Reed has the paint applications equipment you need for the finest quality finishes.

## PLURAL COMPONENT PROPORTIONING & METERING

2K proportioners improve productivity, provide consistently better finishes, and offer the highest degree of ratio assurance by utilizing built-in system safeguards and automated material tracking and reporting. Contact us to learn more about 2K proportioners specific to your finishing applications.

Graco | Binks

## PROTECTIVE COATING APPLICATION EQUIPMENT

High-quality protective coating application equipment improves productivity, reduces operating costs, and sprays the highest solids coatings in the harshest environments. If you have a corrosion control application, ensure proper protection for your finished products with C.H. Reed.

GRACO | BINKS

## POWDER COATING EQUIPMENT

Gain unprecedented control and functionality in your powder coating process. Nordson powder coating equipment provides reliable, repeatable powder coating performance with maximum efficiency and unsurpassed operator control.

Nordson

## SPRAY BOOTHS, OVENS, & INTEGRATED SYSTEMS

From powder cartridge and paint booths, to one-of-a-kind engineered overhead conveyor systems, C.H. Reed has the solution to keep your assembly line operating like clockwork, 24/7, 365 days a year.
